OVERVIEW

The TRITON 7500/3 achieves its remarkable 7,500ft (2,286m) diving depth by utilizing a pressure hull thickness of 300mm (11.8in) and through the use of certified, aircraft-grade materials, lithium phosphate battery technology, and pressure-balanced-oil-filled sub-systems.

The TRITON 7500/3 builds on the venerable TRITON 3300/3 design, sharing the spacious, three passenger interior configuration with luxurious leather sports seating as well as Triton's proprietary Easy-Entry Hatch System, enabling passengers to enter the submersible with ease.

Observation is fundamental to scientific inquiry. The fully transparent, acrylic pressure hull offers pilot and passengers an unrivaled, uninterrupted view of the wonders outside.

The versatile lift points on the TRITON 7500/3 have been configured for launch and recovery using either tender-style davits found in yacht garages, or deck-mounted cranes and A-Frames.

TECHNICAL DETAILS

The tables below show the general specifications for the TRITON 7500/3.

GENERAL

SIZE & WEIGHT

SYSTEMS

Depth	7,500 ft / 2,286 m	Length	15.3 ft / 4.65 m	24 V Supply	Dual Supply + Emergency
Payload	1,100 lb / 500 kg	Width	11.5 ft / 3.5 m	Main Battery	40 kWh
Crew	Pilot + 2 Pax	Height	8.5 ft / 2.6 m	Main Thrusters	2 x 12.5 kW
Speed	3 kn	Weight	24,960 lb / 11,200 kg	Vertran Thrusters	2 x 12.5 kW
Endurance	10+ hours	Pressure Hull Inner ø	69.5 in / 1,766 mm	Control	Joystick, Touch Screen + Manual Override
Main Ballast	8,800 lb / 4,000 kg	Pressure Hull Volume	2,883 l	External Lights	6+ x 20,000 lumen LED
Variable Ballast	397 lb / 180 kg	Hatch Inner ø	21.7 in / 550 mm	Life Support	Oxygen & CO ₂ Scrubber
